

From Father Bill

In June, the Vestry of Christ Church contracted with Down East Renovation in Edenton to take on restoration of our termite and weather damaged bell tower. These pictures were taken on July 29th to give you an “inside look.”

Down East Renovations keeps skilled artisans on staff. Their approach to historic renovation is similar, on a smaller scale, that which brought Notre Dame

Cathedral back from its devastating fire. As you can see from these pictures and a report from this artisans once they got to work, it's a blessing that the vestry commissioned this work now!

Down East Renovation is also restoring the front doors to our church. Why, these restored doors just might be in place this coming Sunday!
